Residential on 0.11 Acres

NONE, Rocky Mountain House, Alberta

If you are searching for a bungalow that has no stairs other than to the basement, then you have come to the right home. Located with side back yard access, this home has room in the double attached garage for your vehicles and there would be enough room in the rear to put an RV if you created an RV pad. As you enter this home you will be welcomed by a nice sized living room with vaulted ceilings and hardwood floors. The rear kitchen and dinette have plenty of counter and cupboard space and most of the cabinets have pull outs. There is a spacious linen closet in the hall central to the 2 bedrooms. The 4 piece bath is located between the primary bedroom and the second bedroom and is built so that you can have plenty of room for a wheelchair if necessary. In addition, there is washer/dryer hook ups in the second bedroom walk in closet should you decide to use the laundry facilities upstairs as opposed to in the basement. The rear primary bedroom is spacious and the 3 piece ensuite houses a large walk in shower. In the lower level you will find a spacious family room for evening entertaining, an additional bedroom, a 2 piece bath and a flex room which could be used as an office or storage. The yard is spacious and adorned with flowerbeds. The house backs onto a small playground with virtually no neighbors visible behind. Both the hot water tank and the furnace were replaced in 2024 and the stove, hood fan and fridge were replaced approximately 3 years ago. This pretty little property is awaiting your arrival.
